PROFESSIONAL SUMMARY

Junior Software Development Analyst with hands-on experience evolving a SaaS platform, web interfaces, and internal systems. Works with Python, JavaScript, TypeScript, React, and Next.js, from UX/UI-oriented front-end development to data integration, authentication, and deployment. With a generalist profile, complements software development with Linux, observability, and AppSec, focusing on quality, technical documentation, and sustainable product evolution.

TECHNICAL SKILLS

DEVELOPMENT	TypeScript, JavaScript, React, React Native, Expo, Next.js, Node.js, Python, HTML, CSS, Tailwind CSS, and REST APIs
DATA AND APPLICATIONS	SQL, PostgreSQL, SQLite, Supabase, Prisma, authentication, RBAC, and audit logging
ENGINEERING AND PRODUCT	Git, GitHub, software testing, UX/UI, technical documentation, Scrum, and Kanban
OPERATIONS AND SECURITY	Linux, Proxmox, Vercel, Azure, AWS, basic Docker, Zabbix, Grafana, Prometheus, AppSec, and Sonatype Nexus

PROFESSIONAL EXPERIENCE

Jun 2026 - Present | Santo André, SP, Brazil

Junior Systems Development Analyst

Xmart Solutions

- Develops and maintains a SaaS platform with Python, JavaScript/TypeScript, and React, evolving web pages, workflows, and internal systems.
- Redesigned the XGuardian interface and built its institutional website, applying UX/UI, responsiveness, visual consistency, and usability.
- Administers Linux servers, troubleshooting, and Proxmox virtualization, with monitoring through Zabbix, Grafana, and Prometheus.
- Supports AppSec and Supply Chain Security practices with Sonatype Nexus and XGuardian, while documenting and standardizing technical processes.

Dec 2025 - Jun 2026 | Santo André, SP, Brazil

Systems Development Intern

Xmart Solutions

- Worked across web development, technical support, infrastructure, observability, and application security before being promoted to a junior analyst position.
- Recovered legacy laptops and assets, organized the server environment, and supported Proxmox administration.
- Implemented Zabbix and Grafana monitoring, deployed SysPass, and produced technical documentation and operational records.

SELECTED PROJECTS

Toca dos Pés | Podiatry Clinic Management System - Full-Stack Developer (Freelance)

2026 - Present | Staging environment on Vercel

- Responsible for designing and developing a system that centralizes scheduling, clients, professionals, services, products, suppliers, inventory, finance, medical records, and reports.
- Modular full-stack architecture with Next.js, React, TypeScript, Tailwind CSS, Prisma 6, PostgreSQL/Supabase, Supabase Auth, private storage, and Vercel deployment.
- Implemented core records, initial scheduling, authentication, RBAC, audit logging, client/server validation, security, and data privacy practices.
- Validated through type checking, linting, builds, dependency auditing, and smoke tests; documented architecture, requirements, environments, and operations.

Clarium | Personal Finance Application - Developer

Personal project | Published application

- Built a local-first application for income, expenses, credit card purchases, monthly planning, and insights with React Native, Expo, TypeScript, Expo Router, and SQLite.
- Created a multilingual landing page with Next.js, TypeScript, and Tailwind CSS, deployed on Vercel.
